SKILLS

- **Languages:** C/C++, Python, Java, XML, Kotlin
- **Frameworks & Libraries:** Numpy, Pandas, Matplotlib, Seaborn
- **Tools/Platforms:** Git, GitHub, VS Code, Power BI, Python IDLE, MS Excel, Spyder, Android Studio
- **Core CS Fundamentals:** DBMS, OS, CN, OOPs
- **Soft Skills:** Time Management, Creative, Problem-Solving, Adaptability, Quick Learner

PROJECTS

Nari Nexus- Empowerment and Safety App for women | [GitHub](#)

June 2025

- Designed an all-in-one women-empowerment app addressing core safety, motivation, and wellness needs through an accessible digital platform.
 - Developed using **Kotlin, XML UI**, and **Firebase Authentication/Firestore**, completing ~85% of **Minimum Viable Product (MVP)** modules including Login, Dashboard, Quotes, Body Positivity, and Swasthya.
 - Delivered a smooth **MVP** tested on Android 5.0+ with 100% successful screen navigation and reliable data sync, ready for SOS and notification integration.
- Tech stack:** XML, Kotlin, Firebase Authentication

Advanced-Disk Simulator | [GitHub](#)

April 2025

- Developed an interactive simulator to visualize six disk-scheduling algorithms and analyze system performance through seek time and throughput metrics.
 - Built using **Python, Tkinter, NumPy, and Matplotlib** with modular FCFS, SSTF, SCAN, C-SCAN, LOOK, and C-LOOK execution, real-time plotting, and CSV-based result logging.
 - Achieved ~65% lower average seek time and up to 3× higher throughput with LOOK and SSTF compared to FCFS, providing a scalable OS learning and analysis tool.
- Tech stack:** Python, Tkinter, Matplotlib, NumPy, CSV.

Driving Toward the Future: Exploratory Data Analysis (EDA) of Electric Vehicles | [GitHub](#)

February 2025

- Performed **EDA** on 100% of the Electric Vehicle Population dataset to uncover adoption trends and distribution patterns.
 - Leaned and processed the data by handling 100% of missing values and correcting outliers for reliable statistical insights across regions and models.
 - Identified that Battery Electric Vehicles make up 79.3% of total registrations, supporting policy decisions and Electric Vehicle infrastructure planning.
- Tech stack:** Pandas, NumPy, Matplotlib, Seaborn

TRAINING

[Logic Building, Programming and Data Structures](#) - LPU

June 2025 – July 2025

- Learned core concepts of programming logic, control structures, functions, arrays, pointers, and data structures such as stacks, queues, and linked lists.
- Developed strong problem-solving skills by working on algorithmic challenges and structured programming exercises.
- Applied programming principles to write optimized, modular, and efficient code using languages like C/C++, focusing on clarity and performance.

CERTIFICATIONS

- OCI AI Foundations- [Oracle](#) September 2025
- Cloud Computing– [NPTEL IIT Kharagpur](#) April 2025
- Legacy Responsive Web Design V8– [FreeCodeCamp](#) November 2023

ACHIEVEMENTS

- Secured First Rank in a competition named E-Lexicon Extravaganza. | [certificate](#)
- Built and refined a working prototype within 24 hours during a hackathon named Binary Blitz Web Hackathon. | [certificate](#)

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.06 Since August 2023
- **Dr. D. Ram D.A.V. Public School** Patna, Bihar
- *Intermediate; Percentage: 60.6%* April 2022 – March 2023
- **Himalayan Public School** Patna, Bihar
- *Matriculation; Percentage: 80.6%* April 2020 – March 2021
